Westboro, MA, 01581

Subject: Forsythe "Eco Logo" Approved Power Flo Hydraulic Fluid
Attention: To Whom It May Concern -

E.L. Harvey & Sons Inc. was first attracted to the unique properties of Forsythe's Power Flo Hydraulic Fluid at the 2005 Waste Expo in Las Vegas, NV. Having a fluid that is Environmentally Approved, fire-resistant, biodegradable, non-toxic and water soluble, provided us with a solution to environmental issues which surround the use of Mineral and Vegetable Oil fluids.

After having tests performed at an independent laboratory in Massachusetts, and discussions with the Department of Environmental Protection, along with the technical support of Forsythe Lubrication and Tapco LLC, we decided to go with Power Flo.

In November 2005 we ordered 10 Ram Jet 225 & 325 compactors from Marathon Equipment for a customer, which we filled with Power Flo hydraulic fluid. The compactors have been operating in sensitive environments, trouble-free, for almost one year. Power Flo is a premium hydraulic fluid that provides peace of mind for asset and environmental protection.

Sincerely,

Steve Harvey
Executive Vice President
E.L. Harvey & Sons
